```
sudo sed -i _bak \
's/rights="none" pattern="PDF"/rights="read | write" pattern="PDF"/' \
/etc/ImageMagick-6/policy.xml
```

And then all should be well, I have tested this comprehensively on my own 19.04 VM where the conversion you are after works *flawlessly*...

If you wish to change the settings back to *the default* the following one liner will restore the backup file created in the run with sed:

```
sudo mv /etc/ImageMagick-6/policy.xml_bak /etc/ImageMagick-6/policy.xml
```

How cool is the command line!
